NATB Statement on U.S. Senate Subcommittee Hearing: “Fees Rolled on All Summer Long: Examining the Live Entertainment Industry”

WASHINGTON, D.C. — Following yesterday’s U.S. Senate Subcommittee on Consumer Protection, Technology, and Data Privacy the National Association of Ticket Brokers (NATB) released the following statement regarding the critical need for comprehensive reform in the live event industry.

“The NATB proudly champions consumer choice. We support a fan’s right to own, use, and transfer their tickets without interference and free from fraud and abuse.

We recognize stronger fan protections are needed and we advocate for a secure and accountable marketplace.

We are committed to building a fairer industry for everyone. We support the FTC’s all-in, upfront pricing rules, BOTS Act and the TICKET Act. Importantly, the fundamental goal of ticket selling reform must be to break down the barriers that lock fans into one-sided platforms, shifting the power away from monopolies and back into the hands of the fans.”
